PROFILE

Enthusiastic MERN Stack Developer with a strong foundation in frontend development. Currently interning at a dynamic startup since July [Year], where I've been instrumental in crafting engaging user interfaces. Rapidly expanding my backend skills to become a well-rounded developer. Eager to contribute my creativity and passion for web development to meaningful projects.

CERTIFICATION

FULL STACK WEB DEVELOPMENT

PROJECT

Blog Page

Simple Blog Page for Save Nature concept fully concentrated on CSS Animation.

Personal Diary

A personal Dairy website using HTML,CSS and JAVASCRIPT created localStorage inside the website without using backend.

Buy Cat

Created simple front-end website using only Bootstrap.

Code Hub

This repository contains the source code for a comprehensive learning app designed to help users acquire new knowledge and skills. The app provides a user-friendly interface for accessing a wide range of educational content, interactive quizzes, and tutorials.

E-commerce

Built an e-commerce website using React js.an online platform for buying and selling products. Features include product listings, shopping cart, secure checkout, and user authentication.

Live Project

Worked as junior developer in a Job Fair Website.Designed the MAIL page and Success message page for registration.
